PROFESSIONAL SUMMARY

Software Engineering graduate of Near East University who builds full-stack and AI-powered web applications with Python, JavaScript/TypeScript and Java, using FastAPI, Node.js, React, Next.js, PostgreSQL and LLMs. Quick learner and strong team player.

EXPERIENCE

Software Development Trainee **August, 2026**
Near East University IT Center - Nicosia, North Cyprus
- **CleanCut**: Node.js app that uses Whisper speech-to-text to bleep or mute profanity in videos
- **Timetable Builder**: Next.js/TypeScript app with Excel import, drag-and-drop and clash detection

Software Engineering Intern **June, 2025 - August, 2025**
Hakeem Engineering Company Ltd. - Khartoum, Sudan
- Developed and tested features for the company's project tracking software
- Built reports, dashboards and data analyses to support project operations
- Handled requirements analysis, documentation and IT support

AI Summer Sprint Bootcamp, LLMs Engineering **July, 2025**
Google Developer Group, Near East University - Nicosia, North Cyprus
- **StudyBuddy**: built an AI academic assistant (Flask), then deployed and pitched it

PROJECTS

Recrify: AI Hiring Tool **2026**
Made with React, FastAPI, PostgreSQL, WebSockets
- Scores resumes against job requirements with an LLM and runs live AI interviews
- Ranks candidates by a weighted final score and generates DOCX reports for HR

Web App Performance Tester **2025**
Python, SQLite, pandas, matplotlib
- Load, failure-injection, rate-limit and stability testing for any web app, API or bot, with CSV and PDF reports

Activity & Project Management System
Made with Java
- Built a system in both Turkish and English, with user accounts and all the activity loggings can be integrated into Banks & Hospitals, etc.,

EDUCATION

Bachelor of Software Engineering **March, 2022 - June, 2026**
Near East University - Nicosia, North Cyprus

TECHNICAL SKILLS

- **Languages:** Python, Java, C++, JavaScript, TypeScript, SQL
- **Frameworks:** FastAPI, Flask, Node.js, Express, React, Next.js, Tailwind CSS
- **Data and AI:** PostgreSQL, SQLite, LLM integration, Hugging Face, Whisper
- **Tools:** Git, GitHub, software testing, VS Code, IntelliJ IDEA
